Professional Summary

Backend engineer with 2+ years at Careem building payment, subscription, and trip services. Experience with event-driven systems, production reliability, and partner integrations.

Professional Experience

Software Engineer II

Remote, Pakistan

CAREEM

June 2024 - Present

Bikes & Tenants (Go, Spring Boot, Next.js, MySQL, Kafka)

- Lead backend engineering for Careem's Bikes and Tenants verticals, covering trip services, payments, subscriptions, and partner integrations.
- Rebuilt trip billing as an event-driven system, eliminating silent payment and refund failures and allowing processing to resume after service restarts.
- Fixed recurring database outages by optimizing queries on tables with 7.5M+ rows; improved response times by up to 42x and halved customer-facing latency.
- Migrated bike subscriptions from a third-party vendor to an in-house billing platform with no downtime; reduced latency from about 5,000 ms to 200 ms for users with many subscriptions.
- Built pay-as-you-go billing for group rides, with card pre-authorization and automatic retries for failed payments.
- Led backend delivery of 5 new tenant services, including Lab Test and Pest Control, in under 6 months, with payment and data integrations.
- Migrated terabytes of customer data across home services categories with no downtime or data loss.
- Built an operator dashboard used daily to manage vehicles, pricing zones, and stations.
- Built local payment-callback tooling and improved developer and coding-agent workflows with repository guidance, local coverage checks, faster acceptance tests, and release automation.

Localization team (Python, FastAPI)

- Built infrastructure for an LLM-powered localization pipeline, reducing manual translation work across multiple languages.

Teaching Assistant

Karachi, Pakistan

INSTITUTE OF BUSINESS ADMINISTRATION

Spring 2023 - 16 months

- Ran tutorials and office hours for Theory of Computation and Algorithm Design.
- Reviewed assignments and provided feedback for 160+ students.

Skills

Programming Languages

Go, Python, JavaScript/TypeScript, Rust, Java

Backend & Data

Microservices, REST APIs, Spring Boot, MySQL, Kafka, Event-Driven Architecture

Frontend

React, Next.js, TypeScript

Tools & Platforms

Docker, Linux, Git, AWS

Education

Institute of Business Administration

Karachi

BSCS

2020 - 2024

- CGPA: 3.67
