Professional Experience

Software Engineer

Remote, Pakistan

CAREEM

June 2024 - Present

- Developed a localization service (Python) leveraging AI (LLMs) for app-wide translation, significantly reducing launch costs for new services.
- Contributed to the Food Search service (Golang), rewriting it for more efficient data aggregation from downstream services and powering the main /search API used by the Careem Food App.
- Led the backend team for Careem's tenants vertical, delivering 6 new service launches, including Lab Test, Pest Control, IV Therapy, Home Cleaning, and Laundry.
- Integrated kafka events for new services orders with the global activities platform responsible for display user activities on the Careem SuperApp.
- Contributed to the Careem Bikes service (Java), including refactoring its pure TCP server responsible for interacting with on-device IOT chips.
- Contributed to the frontend of the Tenants mini-app, launching new offer cards and campaigns based on user segments using Careem's internal cross-platform frontend framework.

Business Solution + IT Intern

Karachi, Pakistan

PTCL BUSINESS SOLUTIONS

Summer 2023 - 2 months

- Automated the process of extracting information from email and publishing to the company dashboard; wrote a python automation scripts that exact data from emails using IMAP protocol and then used LLM to parse the email data as json to upload to notion dashboard.
- Performed misc. IT and Network troubleshooting.

Teaching Assistant

Karachi, Pakistan

INSTITUTE OF BUSINESS ADMINISTRATION

Spring 2023 - 8 months

- Conducted tutorials, 1-on-1 sessions to help students solve problemsets for Theory Of Computation and Analysis of Algorithms courses.
- Graded and provided individual feedback on their solutions for 160 students.

Projects

Quark Programming Language

 rasibn/quark

RUST, RECURSIVE DESCENT PARSING

- Built a programming language from the ground up with mathematical ergonomics primarily as a DSL for quantum computing that transpiles to Python NumPy for efficient computing
- Implemented lexer, parser, and semantic analyzer with support for functions, variables, scoping, basic types, arrays, and matrix operations

Rustaurant

 rasibn/Rustaurant

RUST, WASM, AXUM, MONGODB

- Created a WASM based restaurant reviewing website using Rust (Used MongoDB as the db but probably should have tried opensearch :)

BrickBreaker

 rasibn/BrickBreaker

JAVA SWING

- Led a team of five members, delegated tasks, and ensured effective collaboration.
- Structured game logic using common design patterns (e.g., factory, singleton, abstract factory, builder)
- Conducted testing on Windows, MacOS and Linux.

Skills

Programming Languages Golang, Python, JavaScript/TypeScript, Java, Rust

**Frameworks
& Technologies**

React, Vue, Svelte, Linux, Docker

Education

Institute of Business Administration

Karachi

BSCS

2020 - 2024

- CGPA: 3.70

Whales College

Karachi

A'LEVELS

2018 - 2020

- Grades: A*A*A* in Physics, Chemistry, and Mathematics
